

Product / brand: Maine Gloss Green 75%
Satimat Green 75%

Paper Mill: Besse Sur Braye / Wizernes

Country of origin: France

Website: www.recycled-papers.co.uk

MAINE GLOSS GREEN

Product Data

Maine gloss green 75% is a new generation of premium wood free coated papers produced using a high percentage of recovered fibres, delivering superb environmental credentials without compromising quality. Manufactured with 75% recycled fibre and 25% virgin fibre, FSC® certified.

- Maine gloss green 75% is a gloss coated paper

Available in the following grammages: 100, 115, 135, 150, 170, 200, 250, 300 and 350 gsm.

For more in-depth product information, please request the Technical Sheet

Certified Management Systems

- ✓ ISO 9001 (Quality Management Standard)
- ✓ ISO 14001 (Environmental Management Standard)
- ✓ OHSAS 18001 (Health and Safety Management System)

Product Certifications

- ✓ National Association of Paper Merchants (NAPM)
- ✓ EU Ecolabel (No. FR/011/003)
- ✓ FSC® Certified (No. SGS-COC-003161)

Fibre sourcing and recycling

75% post-consumer fibres, FSC® certified* and PCF (Process Chlorine Free)
25% virgin fibres, FSC® certified and ECF (Elemental Chlorine Free)

*Coming from Greenfield Mill, part of the Arjowiggins Group, less than 280 km from Bessé mill and less than 260 km from Wizernes mill, where the paper is manufactured.

Chemicals

No substances classified as carcinogenic, mutagenic or reprotoxic (CMR) are used as raw materials.

Arjowiggins Graphic complies with new REACH (Registration, Evaluation, Authorisation and Restriction of Chemical Substances) European Community Regulation, created to improve protection of human health and the environment from the risks that can be posed by chemicals as well as the promotion of alternative test methods, free circulation of substances and enhancing competitiveness and innovation.

For more information go to www.echa.europa.eu

Packaging

We work with our suppliers to reduce the amount of packaging used (ream wrapper, shrink film, plastic banding). Today a minimum of 93% of our packaging is recyclable.

Transport

The Arjowiggins Graphic transport policy is eco-responsible, optimising logistics and taking environmental issues into account: i.e. minimizing distances between raw material, mills and customers in Europe, encouraging eco-driving to decrease fuel consumption, shifting volumes to rail and sea transport wherever possible.

Environmental Parameters

Note: These figures include both pulp and paper production.

Arjowiggins Graphic is fully committed to environmental responsibility during the development and production of its pulp and paper*

* Figures based on 2009 measurements

** Fossil energy

		Besse	Wizernes
Water	COD	5.2 Kg/t	4.7 Kg/t
	AOX	0.008 Kg/t	0.008 Kg/t
	N	0.150 Kg/t	0.260 Kg/t
	P	0.015 Kg/t	0.016 Kg/t
Air	SO ₂	0.068 Kg/t	0.067 Kg/t
	NO _x	0.422 Kg/t	0.257 Kg/t
	CO ₂ **	431 Kg/t	269 Kg/t
Purchased electricity		1256 KWh/t	1421 KWh/t
Solid waste landfill		35 Kg/t	35 Kg/t

Carbon Footprint

- Carbon footprint of Bessé mill : 652 kg CO₂/t of paper (PAS2050 Method)
- Carbon footprint of Wizernes mill : 633 kg CO₂/t of paper (PAS2050 Method)

What is a carbon footprint in relation to Arjowiggins Graphic?

Carbon footprint is a measure of the impact human activities have on the environment in terms of the amount of greenhouse gases produced, (measured in units of carbon dioxide equivalent).

Why is measuring your carbon footprint important?

Arjowiggins Graphic calculates its carbon footprint for two main reasons: to assist customers in estimating their own carbon footprint and to monitor the greenhouse gas emissions as a result of our production processes.

How is the Arjowiggins Graphic carbon footprint calculated?

Carbon footprint calculations are not regulated on a global or national basis and this is why Arjowiggins Graphic have selected independent and long established companies to undertake its calculations: The CarbonNeutral Company and ECCM (Edinburgh Centre for Carbon Management) carry out emissions assessments according to the principles of WBCSD (World Business Council for Sustainable Development).

What is the PAS2050 method of carbon footprint calculation?

This is a publicly available specification (PAS) for a consistent method of measuring, reporting and communicating the greenhouse gas emissions (carbon footprint) of goods or services across their lifecycle developed by the British Standards Institute (BSI).

The coverage of carbon footprint calculations:

Our boundaries considered for analysis include the whole production process i.e. from the raw materials to the delivery of finished products. Always check the carbon footprint coverage before comparison to be confident that all the relevant and potential sources of CO₂ have been covered.

Currently Arjowiggins Graphic has chosen a plan of carbon footprint reduction, but not a plan of carbon offsetting.
